

Chief, Services Division

27 November 1950

FOIAb3b1

Chief, [REDACTED]

Emergency Power Supply

FOIAb3b1

25X1A6a

1. Present plans call for move of [REDACTED] offices and equipment for South Building to [REDACTED] during week of 27 November - 3 December 1950, or as soon thereafter as space and communication facilities can be made ready.

FOIAb3b1

2. The continuous 24 hour per day nature of [REDACTED] operation requires that an emergency power supply be available at all times. Such emergency power supply is presently provided by a 7.5 kw Readi-power generator located on the northwest corner of South Building.

FOIAb3b1

3. In order that necessary emergency power supply will be available at the time [REDACTED] is moved it is requested that this generator or its equivalent be installed without delay, adjacent to the head house space which faces south between O and I wings of [REDACTED]. Suitable power throw-over switch and remote start and stop switches should be installed in the head house space. [REDACTED]
